

Senior Product Designer

Ovsyannikova Anastasiya

Senior Product Designer with 8+ years of experience designing complex B2B, enterprise, and internal products. Experienced in XDR, SIEM, platform UX, design systems collaboration, user research, and cross-functional product delivery.

Senior Product Designer

Kaspersky, 2022 - Present

Cybersecurity and digital privacy company

- Designed product experiences across XDR, SIEM, and shared platform initiatives.
- Helped shape XDR from the early stages as a new product.
- Led a full redesign of SIEM using design system foundations.
- Defined platform UX patterns and shared foundations for product integration.
- Designed shared platform areas including asset management, dashboards, reports, and tasks.
- Worked closely with the design system team and engineers on reusable components and scalable UX foundations.
- Improved design quality through formalized design review processes and ongoing design QA.
- Collaborated with product managers, analysts, architects, engineers, and domain experts from early problem framing to implementation.

Designer of Internal Products

Citymobil, 2020 - 2022

Mobility service with taxi, carsharing, and kicksharing products

- Designed internal tools for call-center operators, operating managers, and Citymobil employees.
- Added and documented new design system components.
- Conducted usability testing and in-depth interviews to inform design decisions.
- Reduced average call duration by 30% through a redesigned call-center interface.
- Wrote technical documentation for the new interface and delivered the company intranet design within one month.

Product Designer

Rambler&Co, 2019 - 2020

Major Russian media and digital services holding

- Designed and prototyped web and mobile interfaces for Rambler's internal employee portal.
- Conducted user interviews and usability testing to validate solutions and identify pain points.
- Created a UI kit to improve consistency across the product.
- Worked closely with developers and introduced product analytics and research practices into the workflow.

Product Designer

Superjob, 2019

Job search and recruitment platform

- Designed interaction and visual solutions for web and mobile interfaces, including iOS and Android apps.
- Contributed to the development of the design system and UI library.
- Created prototypes and wireframes for new product concepts and improvements.
- Conducted UX research and usability testing.
- Initiated user interviews and built a base of users ready to participate in research.
